

Dear Hiring Manager,

I am writing to express my keen interest in an entry-level position within your organization. As a Bachelor of Computer Applications (BCA) student at Bharati Vidyapeeth University, with a strong foundation in web development, software testing, and digital marketing, I am enthusiastic about contributing to a dynamic and forward-thinking tech team.

Throughout my academic journey, I have actively engaged in projects that demonstrate both technical proficiency and a collaborative mindset. Notably, I developed a responsive e-commerce website integrating full cart and checkout functionalities using HTML, CSS, JavaScript, and PHP. I also contributed to a college web page project, where I emphasized user experience and cohesive design, and I am currently building an all-in-one banking application using Python and PHP.

My skillset includes proficiency in frontend and backend development, with a solid understanding of UI/UX principles, version control systems like Git, and tools such as NumPy and Pandas for Python-based tasks. I take pride in being a quick learner, adaptive, and consistently dedicated to delivering high-quality work.

I am particularly drawn to your organization's reputation for innovation and its commitment to technology-driven solutions. I am confident that my technical skills, combined with my eagerness to learn and grow, will make me a valuable asset to your team.

Thank you for considering my application. I look forward to the opportunity to further discuss how I can contribute to your organization. Please find my CV attached for your reference.

Warm regards,

Atharva Pradhan
